Main Product Taro Series

Fresh Taro

Taro Powder

Fresh Taro Cubes

Matured Taro Cubes

The raw materials for making taro series are all selected from Guangxi Lipu taro, which was selected as a royal tribute in ancient times. It is rich in nutrition and contains a variety of ingredients such as crude protein, starch, vitamins, high calcium and inorganic salt. After many different scientific processes, it is made into taro powder and taro cubes, which retains the nutritional value and sweet and soft taste of Lipu taro itself.

Taro powder can be used to make mashed taro, milk tea raw materials, baking raw materials, etc. Taro cubes can be used to cook rice, porridge, make cakes, desserts or freshly ground brews, etc.
